

# Make your own nativity scene

The nativity figures on these two pages have been designed to wrap around sections of kitchen roll tube. Cut out the characters and give them to individual children to colour in. If you have a large group, make several angels, shepherds and kings. Once the characters have been coloured, stick them to sections of kitchen roll tube to make instant stand-up figures. Some of the characters are taller than others, so it's a good idea to measure your cardboard tubes before cutting them. To complete the scene, colour a box brown and cover it with straw to make a simple stable. Add a circlet of tinsel to the top of the manger and a coat of cotton wool to the baby.
